MDT Software Selected as a Siemens Solution Partner Automation

ALPHARETTA, Georgia, August 2013 – MDT Software, a world leader in change management solutions for automated manufacturing assets, today announced that Siemens has selected MDT Software to join their Siemens Solution Partner Program supporting their automation products. As a Siemens Solution Partner Automation, MDT has met quality criteria contractually required to provide solutions for the Siemens range of products and services in the fields of automation and drives. This reflects MDT's technical competence in providing change management for Siemens automation devices.

MDT AutoSave is the industry's most advanced feature-rich change management software. AutoSave interfaces with a wide range of automation devices and hardware such as STEP 5, STEP 7, 840D CNC, WinCC and more. Change management support for these devices include archival backups, change detection, change documentation, historical tracking, secured user and workstation access, disaster recovery, controlled editor operations, and automatic change notification. AutoSave unifies automation software under one common user interface resulting in a secure, well documented, controlled environment that dramatically reduces coordination constraints, wasted effort, and safety issues.

"MDT has provided version control and disaster recovery solutions supporting Siemens products for a number of years," said Sascha Fischer, Head of Business Development Endcustomer, Machine Tool business by Siemens. "Their selection as a Siemens Solution Partner Automation validates this existing expertise and helps to build upon it by providing a greater level of technology information exchange and access to resources. Together, our products provide great value to our customers with a completely controlled, market-leading automation environment."

MDT will be a Siemens co-exhibitor at EMO 2013 (Hannover, Germany), the world's premier trade fair for metalworking technology. We invite you to Hall 25, Booth D33 to experience how MDT, in close cooperation with Siemens, offers highly productive automation solutions for machine manufacturers and operators.

About MDT Software, Inc.

MDT Software is a world leader in change management solutions for automated manufacturing devices. MDT's flagship product, AutoSave, empowers users to protect, save, restore, discover, and track changes in industrial programmable devices and plant-floor documents. AutoSave supports the most comprehensive range of devices and editors in the industry from Siemens, Invensys, Schneider, Mitsubishi, Indramat, GE, Rockwell Automation and others. For more information on MDT and AutoSave, visit www.MDT-Software.com.
