MDT AutoSave

Make a program change you wish you hadn't?

No problem. MDT AutoSave Change Management Software allows you to "undo" the change and restore program data. AutoSave reduces errors and minimizes downtime of plant floor automation with the ability to protect, restore, discover and track changes in industrial programmable devices and documents. AutoSave provides complete control over device programs, including:

- Fully automated program archival
- Detail change comparison and notification
- Electronic approval and audit trails
- User access and security control

- Historical record of changes
- Automatic change notification
- Central change repository with automated retrieval

Do you manage remote assets?

AutoSave has you covered. AutoSave enables you to track and analyze changes made to a large numbers of non-networked devices and easily sync them to the server. Other benefits include:

- Ability to synchronize many changes (from many sources) at one time
- Bi-directional synchronization: get updates to managed programs automatically
- Compare the program running in the device to the program on the engineer's laptop.

Are you a System Platform user?

We can take care of that too. AutoSave for System Platform captures all object changes as they are made so even the most recently updated objects, including graphics, templates, instances and more can be restored.

- Remove undesired changes
- Access prior versions of objects
- Detect differences in versions
- Gain insight into an object's associations
- Restore object changes following a Galaxy restoration

MDT SOFTWARE
Automation Change Management

The world's largest manufacturers safeguard their plant automation systems with MDT Software

For over 25 years, MDT Software has been a trusted provider of disaster recovery and change management solutions for leading manufacturers including 3M, Abbot Nutrition, General Mills, Chrysler, Ford, Rio Tinto, Nestlé Purina, and Water Corporation.

MDT AutoSave has enabled these and other global industry leaders to gain control of escalating automation challenges and ease change control burdens by securing software assets, reducing time and problems related to changes, complying with regulatory requirements for audit trails and change authorization, and providing rapid recovery from failures.

PLANT-WIDE SUPPORT

AutoSave supports the most comprehensive range of devices and editors in the industry from:

- **Schneider Electric**
- **FANUC**
- **Bosch Rexroth**
- **Motoman**
- **Denso**

- **Siemens**
- **Wonderware**
- **Omron**
- **Kuka**
- **Kawasaki**

- **Mitsubishi**
- **Rockwell Automation**
- **GE**
- **B&R Automation**
- **Atlas Copco and more.**

MDT's strategic partnerships with automation vendors

MDT AutoSave change management software supports any PC-based application and greatest breadth of automation devices in the industry.

Collaborative Automation by **Schneider Electric**

AVEVA Technology Partner

Solution Partner **SIEMENS** Automation

e-F@ctory Alliance

MDT works closely with these automation leaders to provide the tools and support needed for the development of value-added applications that have proven compatibility with their offerings.

Changes happen. Manage them.

Your company has made a considerable investment in control software to maximize production. By effectively managing changes in program logic, automation assets are safeguarded and your investment is protected from costly errors.

For over 25 years MDT Software has delivered change management and version control solutions for automated manufacturing devices. MDT has customers in almost every industry including **Automotive**, **Pharmaceutical/Life Sciences**, **Mining & Minerals**, **Food & Beverage**, **Petro-Chemical**, **Airport** and **Utilities**.
