Optimize the Value of AutoSave with Online Training

LEARN

REINFORCE

VALIDATE

Proper training is critical to the success of the MDT AutoSave system. MDT offers web-based training courses that consist of a combination of written material, step-by-step instructions using screen shots, and quizzes to reinforce the material. Progression is tracked, and visible throughout the training course, so that a user can stop and return later to finish a course, if needed. The eLearning format of this training enables learners to complete lessons at their own pace and schedule. The following online training is available to MDT partners, customers and registered System Integrators.

AutoSave 7.x User Training

The AutoSave User Training Courses instructs users on how to work with their AutoSave Change Management system.

User Training (Network Client) Course

The purpose of this course is to provide a general overview of AutoSave, including its architecture, use cases, applications, client navigation and common operations. Courses include: *AutoSave Introduction*, *Using the AutoSave App Center*, *Using the AutoSave Network Client* and *Using the AutoSave Portal*.

User Training (Field Client) Course

This course introduces the AutoSave Field Client and how it operates through its three component 'apps': *Program Manager*, *Field Client*, and *Synchronizer*.

Advanced User Training Course

This course includes access to both User Training courses, and will cover AutoSave advanced topics for users who seek to be experts in the use of AutoSave, and may have the responsibility of configuring AutoSave programs and devices. Included are topics that may be performed by an advanced end user, but does not include administrative functions, which are covered in the AutoSave Administrator course. Topics include: *Device Creation and Configuration*, *Advanced Program Management*, *Scheduled Operations*, *System Administration*, *Program Unlock Editor*.

AutoSave 7.x – User Training (Network Client)

- ✓ 1. AutoSave Introduction
 - 4 Topics | 1 Quiz
 - ✓ 1.1. Why Change Management
 - ✓ 1.2. AutoSave Scope
 - ✓ 1.3. AutoSave Use Cases
 - ✓ 1.4. AutoSave Architecture
 - AutoSave Introduction - Quiz
- 2. Using the AutoSave App Center
 - 2 Topics | 1 Quiz
- 3. Using the AutoSave Network Client
 - 8 Topics | 1 Quiz
- 4. Using the AutoSave Portal
 - 2 Topics | 1 Quiz

AutoSave 7.x Administrator Training

The course includes access to both User Training courses, as well as Advanced User Training, and provides additional administrative training for the AutoSave system. The following lessons will be covered within this course: *Licensing, App Installer, User and Client Configuration, Privileging and System Maintenance*.

Reinforce & Validate Learning

The format and tools provided in MDT's Online Training courses enable users to track learning progress, identify areas that need further review and increase retention of information.

- Hands-on experience is one of the most effective ways to reinforce learning and many topics in the courses include exercises to perform on your AutoSave system.
- Quizzes at the end of each lesson validate that the content has been understood and the user has the appropriate knowledge to move onto the next lesson. This increases the overall effectiveness of a course by increasing engagement level and heightening retention.
- The ability to go back and review any topic in a course already taken, at any time, aids in the useful application of information.

Exercise 3.2 – Client Navigation

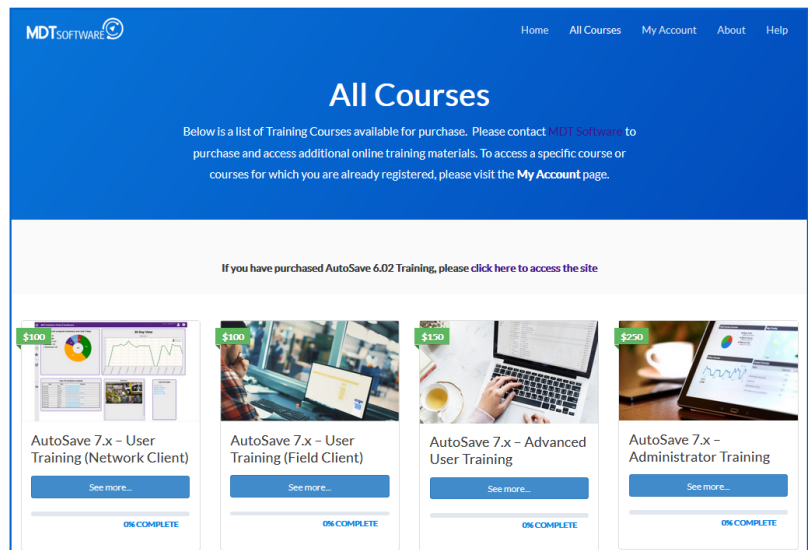

1. Open the AutoSave Client and navigate the tree structure.*
2. Notice the username, client and server information at the top.
3. Select the "Search" pane at the bottom-left, and type in the partial name of a program to find it.*
4. Select the "Manage" pane at the bottom-left to access the administration area of the Client.
5. Select the "Explore" pane at the bottom-left, to return to the Folder tree.
6. Right-Click on a folder, and select "Properties" to view the details of the folder.*
7. Double-click a program, and see the details pane open on the right.*
8. Browse through the Menu's at the top of the Client (File, Edit, Window, Help) to become familiar with the options. Some of these will be discussed in more detail in following sections.

* Assuming programs have already been configured in the system
